

# Responding to the Community's Need for Accessible and Affordable Health Care Over the Years

## The Bottom Line:

As a 501.c.3 nonprofit corporation West Side Community Health Services has annual expenditures just over \$25 million. Approximately 33% of our revenues are derived from federal, state and local grants. The remainder of our revenues are derived from third party and patient based reimbursements. Patients have access to our services regardless of their insured status and regardless of their ability to pay for services upon demonstrating financial means. For the calendar year 2015 we provided over \$18.75 million dollars in sliding fee discounts through our West Side Cares Discount Program. We receive support as a FQHC through the US Department of Human Services (HRSA).
